

Project Demo Planning

Date	1 July 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	1 Mark

Project Demo Planning:

This document outlines the demonstration plan for the Flood Prediction System, covering the project workflow, key features, machine learning model, Flask application, and flood prediction results in a clear and organized manner.

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction	Introduce the project, objectives, and the flood prediction problem.	2	Charan
2	Solution Overview	Explain the system architecture, dataset, preprocessing, and machine learning workflow.	3	Saksham
3	Live Feature Demonstration	Demonstrate the Flask web application, prediction process, and output results.	5	Hemalatha
4	Model Performance	Present the machine learning models, evaluation metrics, and prediction accuracy.	2	Mounika
5	Future Scope	Explain scalability, cloud deployment, and planned enhancements.	2	Lavanya
6	Conclusion & Q&A	Summarize the project and answer questions from the evaluation panel.	3	All Team Members

Demo Flow Summary:

Step	Activity	Notes
1	Introduction & Problem Statement	Explain the need for an intelligent flood prediction system and its societal impact.
2	Solution Overview	Present the project architecture, dataset, preprocessing steps, and machine learning approach.
3	Live Feature Demonstration	Demonstrate user input, flood prediction, and output generated by the Flask application.
4	Q&A Session	Address questions from evaluators and discuss future enhancements.
