

Team Involvement in Demonstration

Date	1 July 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	1 Mark

Team Involvement in Demonstration:

This document describes the demonstration activities for the Flood Prediction System, including the project workflow, key features, machine learning model, and prediction results, ensuring a structured and effective presentation.

S.No	Team Member Name	Role in Demo	Section Presented	Contribution Summary	Participation (Active / Passive)
1	Teerdhana	Dataset Collection	Dataset Collection	Presented the collection of historical rainfall and weather datasets used for training the flood prediction model.	Active
2	Indhu	Data Preprocessing	Data Preprocessing	Demonstrated data cleaning, preprocessing, handling missing values, and preparing the dataset for model training.	Active

3	Indhu	Feature Engineering	Feature Engineering	Explained feature selection and the importance of rainfall, cloud visibility, and seasonal rainfall in prediction.	Active
4	Teerdhana	Model Development	Model Development	Demonstrated the training and evaluation of the Decision Tree, Random Forest, and K-Nearest Neighbors models.	Active
5	Teerdhana	Model Prediction	Model Prediction	Demonstrated the prediction module by entering weather inputs and displaying flood risk prediction results.	Active
6	Both	Q&A Support	Discussion Session	Answered evaluator questions and explained project implementation	Active

Team Coordination Notes:

Aspect	Details
Team Leader / Coordinator	Teerdhana / Indhu
Over all Team Coordination Rating (1-5)	5/5
Any issues during demo	Minor synchronization issues occurred during the initial rehearsal.
How issues were resolved	Conducted multiple rehearsal sessions, assigned clear responsibilities to each team member, and finalized the demonstration flow before the final presentation.
