

Brainstorming & Idea Prioritization Template

Date	26 June 2026
Team ID	
Project Name	Rising Waters
Maximum Marks	3 Marks

Step-1: Team Gathering, Collaboration & Problem Selection

The team gathered to collaboratively discuss and analyze different ideas related to disaster management, focusing on improving flood prediction and early warning systems using a machine learning approach.

Step 2: Brainstorm and Idea Listing

Each team member lists as many ideas as possible without judging them at this stage to explore different solutions for flood prediction and early warning systems.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Tecrdhana	ML Flood Prediction	Model	1
2	Indhu	Weather Monitoring	Prediction	1
3	Tecrdhana	Rainfall Analysis	Data	2
4	Indhu	Flask Web App	Deployment	3
5	Indhu	SMS/Email Alerts	Notification	3

Brainstorming & Idea Prioritization Template

Step 3: Idea Prioritization

Each group of ideas is evaluated based on feasibility and importance, and the most effective solution is selected for further development in the flood prediction system.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	ML Flood Prediction System	High	High	1	Yes
2	Historical Rainfall Analysis	High	High	2	Yes
3	Flask Web App + Alert System	Medium	High	3	Yes
