Customer Journey Map

The following Customer Journey Map outlines the user's experience at each stage of interacting with the Flood Prediction System. It highlights customer actions, touchpoints, thoughts, feelings, process ownership, and opportunities for improvement.

Phase of Journey	Stage 1	Stage 2	Stage 3
Actions <i>What does the customer do?</i>	- Open web application - Enter weather data Submit details	- View flood prediction - Check risk level - Review alerts	- Take preventive action - Download report - Monitor updates
Touchpoint <i>What part of the service do they interact with?</i>	- Flask Web UI - Weather input form	- ML Prediction Engine - Result	- Alert System - Reports
Customer Thought <i>What is the customer thinking?</i>	- Is my data correct? - Will the system predict accurately?	- What is the flood risk? - Should action be taken?	- How can damage be reduced? - Is the situation improving?

Customer Feeling <i>What is the customer feeling?</i>	• Curious • Hopeful	• Concerned • Informed	• Prepared • Relieved
Process Ownership <i>Who is in the lead on this?</i>	• User	• ML Prediction System	• Disaster Management Authority
Opportunities <i>How can we improve this stage?</i>	• Simplify data entry • Auto-fill weather data	• Improve prediction accuracy • Faster response	• SMS/Email alerts • Real-time weather updates
